Research

My research focuses on invertebrate response to major climatic shifts in Earth's history. I use a number of different quantitative techniques, including various extinction rate calculations, community-level diversity indices, and stratigraphic paleobiology to determine when and why organisms survived or went extinct. I also use morphological analysis to determine which traits were advantageous for survivors.

Education

University of California Santa Cruz, Santa Cruz, CA
PhD Candidate, Earth and Planetary Sciences, 2026

Mount Holyoke College, South Hadley, MA
Bachelor of Arts in Biology and Geology, Cum Laude in Biology, 2019

Meeting Abstracts

Geological Society of America Conference. San Antonio, TX. October 2025. Selective Survival of Infaunal Decapods in the Cenomanian-Turonian (OAE 2). Oral Presentation

Geological Society of America Conference. San Antonio, TX. October 2025. Change in Ostracod Sexual Dimorphism in Response to the PETM. Poster

North American Paleontology Conference. Ann Arbor, MI, USA. June 2024. Selective Survival of Infaunal Decapods over the Cenomanian-Turonian (OAE 2). Oral Presentation.

Geological Society of America Conference. Pittsburgh, PA. October 2023. Selective Survival of Infaunal Decapods over the Cenomanian-Turonian (OAE 2). Oral Presentation.

Geological Society of America Conference. Denver, CO, USA. October 2022. Selective Extinction in Decapods Based on Life Habit Over the Cenomanian-Turonian (OAE 2). Poster.

Mount Holyoke College Senior Symposium. South Hadley, MA. April 2019.

AWARDS

J. Casey Moore Graduate Student Award, January 2025
Dean's Travel Grant, March 2023.
Regent's Fellowship, August 2020.
Cum Laude in Biology May 2019
DAAD Undergraduate Fellowship, May 2017, May 2018.
Joanne Creighton International Internship Award May 2018;
Edeltraut P. Barret Memorial Prize, May 2017

RESEARCH EXPERIENCE

Graduate Student Researcher,
September 2020 – present
Dr. Matthew Clapham, UC
Santa Cruz, Santa Cruz CA

Undergraduate Evolutionary
Biology Researcher,
September 2017 – May 2019
Dr. Stan Rachootin, Mount
Holyoke College, South Hadley,
USA.

Eurypterid Morphology
Researcher, May 2018 - August
2018
Prof. Dr. Joachim Haug, Ludwig
Maximillian Universität,
München-Martinsreid,
Germany.

Palynology Researcher, May
2017 - August 2017
Prof. Dr. Hermann Behling,
Georg August Universität
Göttingen, Göttingen,
Germany.

LEADERSHIP

*CORE Research Mentor January
2025 - present*

- Mentored undergraduate students in lab research

*SIP Research Mentor, June - August
2024, 2025*

- Mentored high school

In a Pinch: Convergent Evolution Between the Mouthparts of *Eurypterus lacustris* and *Procambarus clarkii*. Oral Presentation.

Northeastern Paleobiology Meeting. Amherst, MA, USA. April 2019.
Convergent Evolution Between the Mouthparts of Eurypterids and Malacostracans. Poster.

Mount Holyoke College Learning from Application (LEAP) Symposium. South Hadley, MA, USA. October 2017.
People, Pollen and Paleoecology: Human impact on Holocene vegetation dynamics of sub-montane rainforest in Kerinci Seblat National Park, Sumatra (Indonesia). Oral Presentation.

RISE Undergraduate Conference. Heidelberg, Germany. July 2017
People, Pollen and Paleoecology: Human impact on Holocene vegetation dynamics of sub-montane rainforest in Kerinci Seblat National Park, Sumatra (Indonesia). Oral Presentation.

Mapping and GIS

Lead Geographic Information Systems Technician, February 2020 – June 2020
Apple Inc. via Apex Systems, Sunnyvale CA.

- Lead a team of 4-6 contractors
- Created instructional material to streamline production

Geographic Information Systems Technician, August 2019 – June 2020
Apple Inc. via Apex Systems, Sunnyvale CA.

- Digitized roads in the US, Puerto Rico, Italy and Scotland

Science Education

Graduate Student Instructor “Introduction to Teaching for Graduate Students”, UCSC Earth and Planetary Science Department, Fall 2025

Graduate Pedagogy Fellow, UCSC Teaching and Learning Center, January 2024 – present, UC Santa Cruz, Santa Cruz CA

Teaching For Equity Certificate Training, UCSC Teaching and Learning Center, March 2022 – June 2022

Invertebrate Paleontology Teaching Assistant, UCSC Earth and Planetary Science Department, Fall 2021, 2023 and 2025

- Organized fossil teaching collection and created new lab exercises to improve student engagement
- Designed lab exam to test student’s identification skills

Introductory Physical Geology (EART10) Teaching Assistant, UCSC Earth and Planetary Science Department, Spring 2023 and Winter 2025

California Physical Geology (EART5) Teaching Assistant, UCSC Earth and Planetary Science Department, Fall 2022

Vertebrate Paleontology Teaching Assistant, UCSC Earth and Planetary Science Department, Winter 2022

Field Geology Teaching Assistant, UCSC Earth and Planetary Science Department, Spring 2021

Survival Skills Instructor, Avid4 Adventure, June 2019 – August 2019
Avid4 Adventure, Palo Alto CA.

- Taught outdoors skills, ecology to groups of 13 children from ages 5-13

Evolution Teaching Assistant, Mount Holyoke Biology Department, January 2019 – May 2019
Mount Holyoke College, South Hadley MA.

students in lab research

Skype a Scientist Educator, March 2024 – present

- Introduced science and research to elementary and middle school groups

GEMS Mentor, September 2023-June 2024

Whole Earth Seminar Coordinator, December 2022 – June 2023

- Invited seminar speakers in a variety of different geology-related subfields

Astrobiology Summer Reading Group Coordinator, June 2021 – August 2023

- Hosted a 10-week reading group series to facilitate interdisciplinary discussion of topics in astrobiology

UC Santa Cruz Earth and Planetary Sciences Department Mentorship Program September 2023-June 2024

URGE Pod Member, September 2020

GEODES Publicity Coordinator, September 2020 – present
UC Santa Cruz, Santa Cruz CA

Community Advisor, August 2016 – May 2019.
Mount Holyoke College, South Hadley MA

- Prepared specimens, experiments and demonstrations for lab classes.

Zoo Camp Intern, Education Department, May 2016 - August 2016

San Francisco Zoo, San Francisco CA.

Taught animal science, ecology and conservation to groups of 20 children from ages 7-11.
